SUMMARY

Recent Software Engineering graduate from COMSATS University Islamabad with hands-on experience in Python, Machine Learning, Backend Development, and Generative AI. Built RAG chatbot, CNN-based skin disease classifiers, and LLM-powered assistants.

TECHNICAL SKILLS

Languages: Python
AI & Machine Learning: Supervised Learning (Regression/Classification), CNNs, Transfer Learning, Transformers, LLMs, RAG, Embeddings
Libraries & Frameworks: FastAPI, TensorFlow/Keras, LangChain, Scikit-learn, OpenCV, NumPy, Pandas, ChromaDB
Web & Tools: React, Vite, TailwindCSS, Git

PROJECTS

Printing Consultant RAG Chatbot

Python, LangChain, ChromaDB, Embeddings, LLMs, RAG, React

- Built a document-grounded RAG chatbot for context-aware question answering using custom knowledge-base documents.
- Implemented document chunking, vector embeddings, and ChromaDB semantic retrieval to provide relevant context to the LLM.
- Built a responsive business website and integrated the chatbot using React and Tailwind CSS.

Medical Skin-Disease Question Answering Assistant

Python, Groq API, Llama, Flutter

- Integrated the Groq API with a Llama model for low-latency inference for an LLM-powered assistant for informational responses to skin-disease-related user queries.
- Designed domain-specific prompts and response constraints to improve relevance and maintain a clear response scope.

Skin Disease Detection Application

Python, TensorFlow/Keras, OpenCV, NumPy, Scikit-learn, FastAPI

- Fine-tuned pretrained ResNet50, EfficientNetB3, and MobileNet models for skin disease classification.
- Applied early stopping and regularization, achieving up to 93% validation accuracy.
- Developed a FastAPI inference endpoint for real-time image-based predictions.

WORK EXPERIENCE

NETSOL Technologies

Intern – Transcend Department

Aug 2025 – Sep 2025

- Supported integration between Flutter application workflows and FastAPI backend services.
- Assisted with API integration and data flow for machine-learning model features.
- Collaborated in an Agile development environment while following coding standards.

EDUCATION

Bachelor of Science in Software Engineering

2022 – 2026

COMSATS University Islamabad, Lahore Campus

CGPA: 3.42 / 4.00

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification

August 2026

DeepLearning.AI and Stanford Online, via Coursera

Credential Verification
